**DAYCO**  
MOVE FORWARD. ALWAYS.™

## WATER PUMP

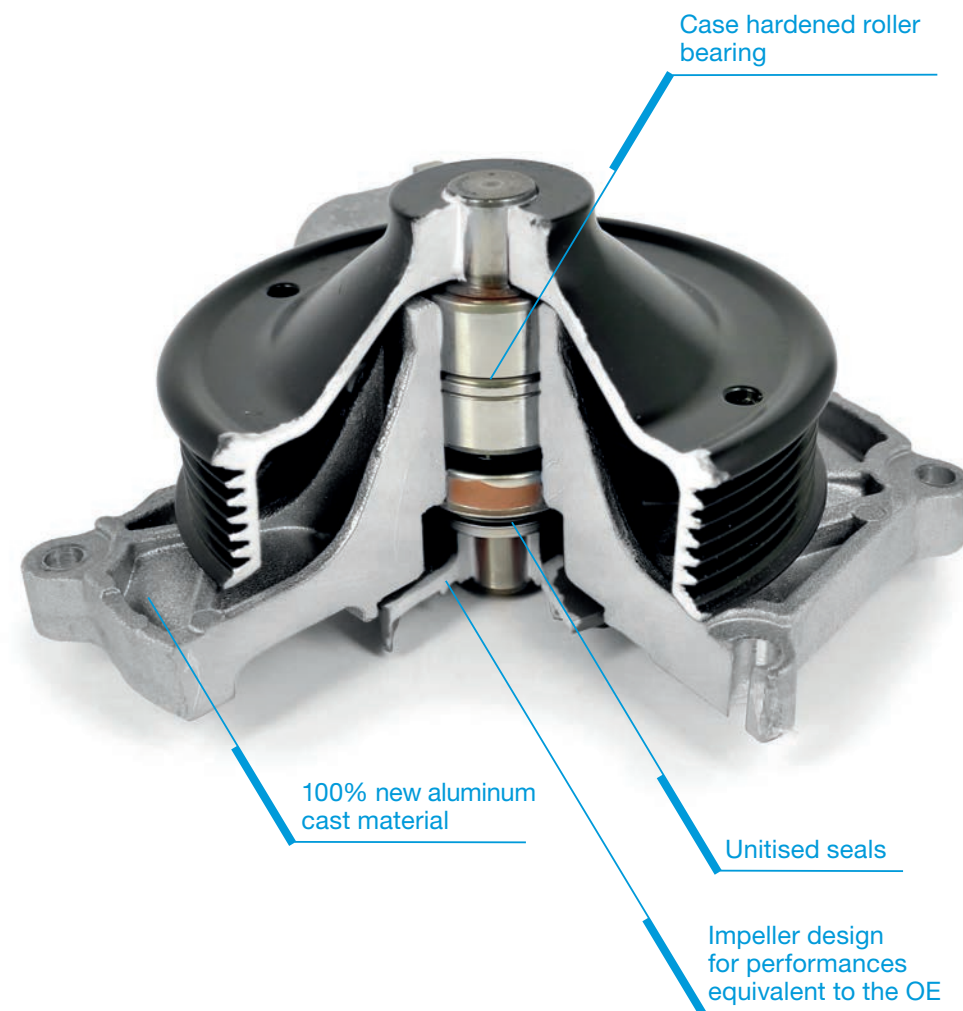

## A MORE EFFICIENT WATER PUMP FOR A GREENER ENGINE.

- OE quality water pumps
- Low friction seals
- Long life bearing grease
- 100% functional tested
- Manufactured with the same high standards of Dayco OE components
- Developed for each individual application

# WATER PUMP

Technical characteristics of the water pump:

## INTRODUCING THE NEW WATER PUMP.

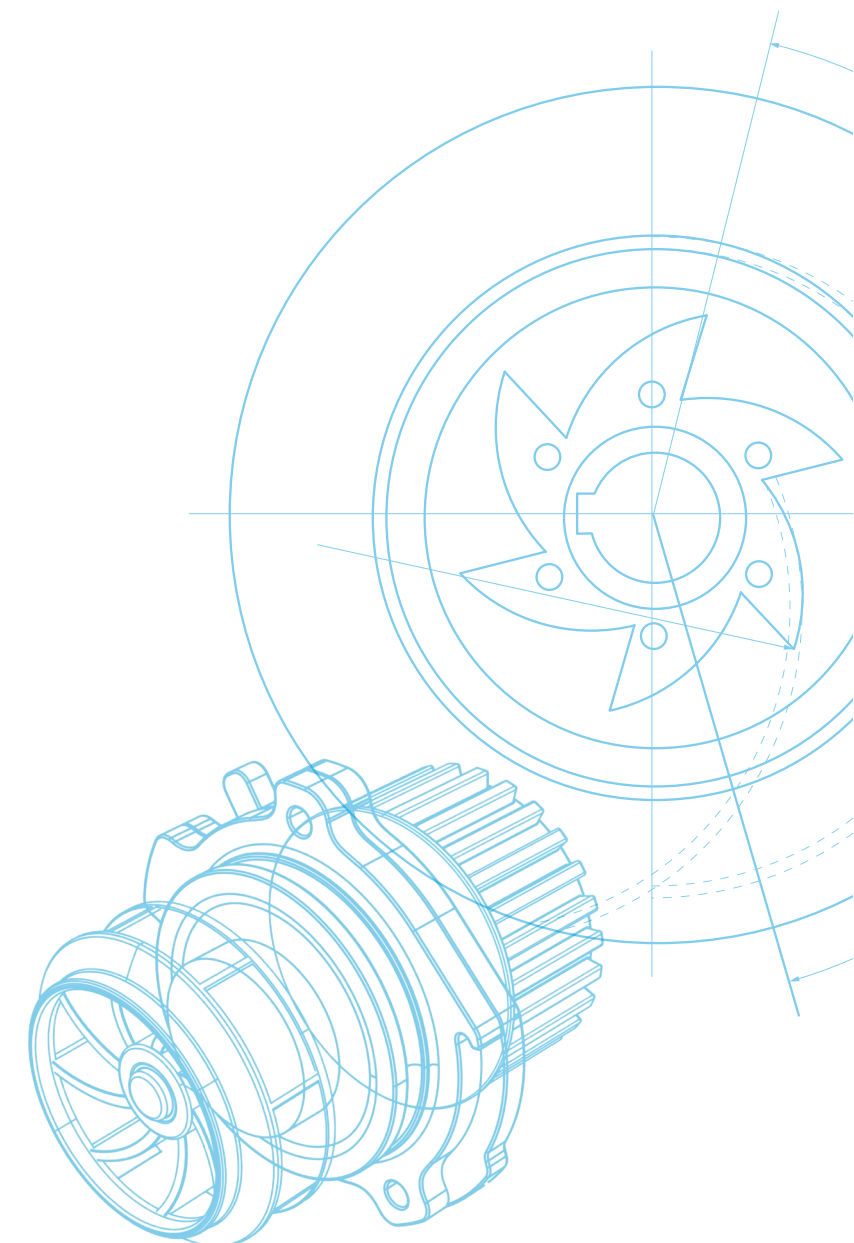

Dayco is a technical leader in the design and manufacture of engine products and low friction power transmission systems which it supplies to its vehicle manufacturer partners.

The water pump is an integral part of many primary drive systems and the latest designs contributes to today's low friction "Green" primary drive system requirements.

All Dayco water pumps are manufactured to the same high standards as the many existing components the company manufactures, each Dayco water pump features the very latest technology including low friction seals, long service life bearing's grease and impellers that are

optimised for each individual application.

With market leading manufacture, you can be sure you are fitting the best.
